University constantine 3

Constantine, Algeria

Online voting system

OVERVIEW

Making cabinet elections of the student's association possible regardless of the distance of the distance and any changes on anyway

GOALS

1. Making it possible for students to participate in the election process regardless of their location while in Algeria.
2. Automating the whole nomination and election process.
3. Election validation, authenticity and transparency.
4. Get the accurate size of the ugandan students in Algeria

SPECIFICATIONS

The system makes it possible for all applicants to apply online with their manifestos which are accessible publicly to the whole student's community, where the Electoral Commission will also be able to qualify them according to the set criterias. With that in place it has a timed voting period for the community after and the nomination of the candidates, all following the electoral commission's timeline of events.

VALUE TO THE COMMUNITY

1. Ensuring nobody is left out on election due to distance or any other life circumstances.
2. Saving time and money for the candidates during the campaign time, that's the time and transport while visiting different wilayas in the quest of looking for supporters

MILESTONES

- 2020/21 USAA Cabinet elections

The system was used to handle the election process of the USAA cabinet 2020/21 and it was all successful, the whole process automated

Market and distribution

With the target market being the community's student, the link to the web system shall be posted in different groups of different promotion to get the masses of students

Sustainability strategy

With the \$100 grant, I shall be able to Carter for all the online services needed to support our system and we have another round of successful elections this year. And with the preceding times the cabinet in power will be expected to fund the online services to continue supporting the online election, only during the time when it is needed.
